Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 47-63, 97-113 and 145-165, drawn to receiving usage reports from recipients of scheduled channel content transmitted in multicast packets, classified in class 709, subclass 224.
- II. Claims 172-196, drawn to sending multicast packets containing information retrieved by a web crawler, classified in class 709, subclass 202.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as gathering information from popular web sites for distribution to several end users. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to John Whelan (Reg. No. 32,448) on November 22, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2666

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
